

**Weathersfield Service Group VI  
Manager's Report  
Friday, February 19, 2010**

**Financials**

January financials are complete & have been shared with both John & Charlie.

**Work Orders**

Since January 15, 5 new work orders have been processed and 16 work orders have been closed.

**Landscaping**

Jon Hanna from EcoLogic completed the tree work in January.

The team at Ecoscapes has been blowing leaves and picking up debris from the most recent storms. They have completed the tree removal and stump grinding we requested and plan to finish a project to add plants to a close and to a couple of residences by the end of the month, weather permitting.

Keith at Ecoscapes is looking into a way to keep the drains at the 530 close from clogging with pine needles. His men cleaned out three of the four drains this week at no charge.

**Special Projects**

Greg Tilley will blow the pine needles off the roofs and pressure wash the residences the week of March 1.
