

Dear Resident,

Beginning in February we will begin a project to better display the connection between each residence and their corresponding garage. We will be installing an address plate in the center of each garage frame. These plates will take limited time to install and will help all visitors to identify the proper garage. Tony Brafford will be helping a couple of board members to install the plates. There may be times when we will be requesting your assistance to make sure we have identified the garages properly. This is similar to what has been done in Countryhouse, although our design will better match our current house addresses.

We currently have 3 Closes (594, 595, 596) which have a letter as part of their address. We have had some difficulties with emergency vehicles finding the right residence in those Closes, especially at night. As a phase 2 to this project, we plan to add the letter of the same design to the front post of each porch in those Closes. This will better able emergency vehicles to quickly find the source of the distress call.

Thank you in advance for your cooperation,

Larry Layton, Weathersfield Board Director of Building and Maintenance

(Please call Larry at 919-260-8783 if you have questions.)
